ARMY ENGINEERS SAY PONTON PROJECT SHOULD NOT BE BUILT

The excessive cost of incorporating power generation facilities in the project and major potential losses of fish and wildlife values have prompted a recommendation by the Corps of Engineers that Pontoon Dam at Dummer, N. H., NOT be constructed. The Corps has announced.

Decision against construction of the \$73.3 million multiple-purpose structure for flood control, power and recreation on the Androscoggin River followed a finding by the Federal Power Commission which worked in conjunction with the New England Division, Corps of Engineers that alternative means of meeting the electric peak load demands could be provided at less cost.

The determination by the U. S. Fish and Wildlife Service that substantial fish and wildlife losses could be expected if the project were built was another factor in the adverse decision.

The report on the 106-foot dam, Androscoggin River, New Hampshire and Maine, including description of the multiple-purpose project, has been forwarded by Colonel Remi O. Renier, head of the Corps in New England, to Chief of Engineers in Washington, and to members of Congress and the Governors of New Hampshire and Maine.

MAINE MOTORISTS OFFERED TIPS FOR SAFER FOURTH OF JULY DRIVING

Maine motorists today were urged to apply four driving tips to make their July 4 trips safer and more pleasant.

The suggestions were given by Peter McKenney of the Highway Safety Committee as part of a safe July 4 driving campaign.

The four-point plan:
"1. Have the family car safety checked bumper to bumper. A safe drive demands a car kept in safe driving condition.
"2. Lock all doors from the inside before you drive. This helps keep you and your passengers in, and other people out. Lock the doors from the outside when you park, to protect both the car and its contents from theft.
"3. Buckle all safety belts before you start the car. This simple act can save lives and prevent or reduce injuries in case of a crash. It can also lessen fatigue on long trips.
"4. Stay alert. On long trips, take frequent rest breaks to guard against fatigue, drowsiness and lack of attention."

KEEP MAINE GREEN CHAIRMAN URGES CAUTION TO PREVENT FOREST FIRES

Citing the expanding need for wood as an essential for America's growth and the rapidly developing use of woodlands for recreation activity, Sumner L. Burgess, chairman, Keep Maine Green committee, and manager, Oxford Paper Co., today called for continued citizen cooperation in preventing forest fires.

"Prevention is infinitely cheaper than suppression and keeps our forests green and growing," the chairman said. "Despite a wet spring, warm weather and drying winds could set the scene for forest fires and upset the good record achieved to date."

Burgess noted that when forestry as a modern science came into being the detection and suppression of forest fires was the first problem to receive major attention. Owners of timberland could not be persuaded to practice forest management or plant seedlings if the threat of fire remained high on the list of dangers.
